

# ADAPTABLE OUTCOMES FRAMEWORKS

## program specific performance measures

### Methodology independent outcomes management

In CommunityCI we believe each program's outcomes are best measured by implementing the most relevant outcomes framework and reporting tools. We design the performance measures, assessment scales and reports that best evaluate the program's performance and client outcomes.

Our frameworks cover many evaluation domains from community and family to psychological assessments and education. Talk to us about your program and how you would like to measure outcomes...

The screenshot displays the Community Collective Impact outcomes management interface, which is divided into several sections:

- SAFETY:** A form with the question "Does the participant feels safe and included in the playgroup activities?". The response options are: Never, Almost Never, Sometimes (selected), Almost every time, and Always.
- SOCIAL AND COMMUNITY:** A form with two questions:
  - "Is participant interacting with other children during playgroup?" with response options: Never, Almost never, Sometimes, Almost every time (selected), and Always.
  - "Has participant's parent increased their social connection within the community?" with response options: Not at all and Very little.
- CORE SKILLS:** A form with three categories:
  - Learning Skills:** Minimal / no progress demonstrated, Demonstrated improvement (selected), Successful completion.
  - Oral Communication Skills:** Minimal / no progress demonstrated, Demonstrated improvement (selected), Successful completion.
  - Digital Technology Skills:** Minimal / no progress demonstrated (selected), Demonstrated improvement, Successful completion.
- EMPLOYABILITY SKILLS:** A form with the question "Employability Skills" and the response option: Minimal / no progress demonstrated.
- REPORT:** A dashboard showing performance metrics. It includes a table titled "Participants satisfied with the program/service" with columns for No, Yes, and Total. Below the table is a pie chart and a line graph showing trends over time from Jan 16 to Jan 18.
- REPORT (Detailed):** A detailed report view showing a radar chart for "Employability Skills" with axes for Oral Communication Skills, Learning Skills, and Networking Skills. It also includes a list of domains and project types.
