

# EFFORTLESS DATA INTAKE AND SUBMISSION

## end to end integrated solution

### Outcomes data intake and government reporting solution that work

CommunityCI seamlessly integrates with Community Data Solution CRM to simplify client outcomes intake pre and post service. Government reporting process is simplified using an electronic submission process.

CommunityCI for funding bodies is a multi-tenant solution enabling governments and peak-bodies to design outcome frameworks and questionnaires and collect data from providers via a single online cloud solution. Talk to us about your government outcomes needs...

**HOW WELL ARE WE DOING IT**

**Is the participant from the priority group?**

	Pre Service	%	Post Service	%
Yes	0	0%	261	100%
No	0	0%	0	0%
Not Assessed / Blank	0	0%	1	0%

**Story behind the data**

The priority group for FLIP north is defined as 'Disadvantaged, at risk or vulnerable people experiencing financial hardship'. AnglicareSA's central intake and assessment process ensures participants are allocated to the correct program, based on their location, ensuring they are from the 'priority group'.

**Did the participant complete the program or service?**

	Pre Service	%	Post Service	%
Yes	0	0%	142	54%
No	0	0%	2	1%
Not Assessed / Blank	0	0%	118	45%

**Story behind the data**

Participants completing the program include those attending financial education workshops, who are not allocated an ongoing case file, as well as clients who have moved on from the program. Within AnglicareSA, clients are made 'inactive' once their presenting issues are resolved, with workers following up at 3 month intervals to ensure their finances are stable. Once a file has been inactive for 12 months, their file is closed and in the case of R2D2, this is when they are marked as completed.
